What is a JSA?

- Method of identifying hazards
- Means of breaking the job down into steps
- System for easily understanding hazards.
- **PREVENTING INJURIES.**
- A work in progress

Cutting Banding JSA

BASIC JOB STEPS	POTENTIAL HAZARDS	RECOMMENDATIONS
<u>Wear appropriate PPE</u> <ul style="list-style-type: none"> • <u>Safety glasses</u> • <u>Gloves</u> • <u>Long pants</u> • <u>Long sleeve shirt (if necessary)</u> 	<u>Being struck or cut by banding when cutting bands.</u>	<u>Stay clear of bands when cutting.</u>
<u>Make sure other employees are clear from area. Some banding is very tight and under pressure.</u>	<u>Someone else could be hurt by banding coming off in their direction.</u>	<u>When cutting the banding make sure you know your surroundings and that they are clear.</u>
<u>Cut squarely with tin snips, not “make shift” tools, i.e. crowbar, claw hammer, etc.</u>	<u>Not cutting squarely will make sharp corners and using the wrong tools could increase the chance of getting hurt.</u>	<u>Take a moment to decide the safest way of cutting. If there are several straps squarely cut the one farthest away from you first. Stay out of the zone in which the strap will spring back</u>
<u>After cutting the straps, dispose of all material in the proper garbage container.</u>	<u>Employees could trip on strapping that was just cut off.</u>	<u>Dispose of all loose material before proceeding.</u>

INJURIES DO HAPPEN

- Is there a J.S.A ?
- If no, write one
- If yes, was the J.S.A followed
- Update the J.S.A
- Make sure employee's help rewrite
- Update all employee's when done with the update.

EXCUSES

- Complacency
- Lazy
- Short Cuts
- Have to get this job done
- All most time to go home
- My way
- I've been doing it like this for years

ENFORCEMENT

- Verbal warning
- Written Warning
- Time off from work.
- Termination.

- Employee's and Employer
- Read and understand the J.S.A.
- Follow the rules.
- Prevent Injuries.
- Look out for your fellow employee's
- Team work is the only type of work.

Don't be a Stooge
