MAINE WATER UTILITIES ASSOCIATION

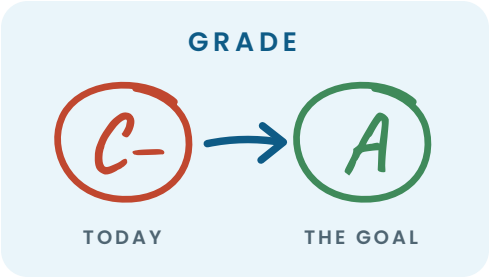

MWUA Water Infrastructure Forum

Wednesday, 28 October, 2026
Refreshments served

Governor Hill Mansion
Augusta, ME

Doors open 7:45 AM
Program 8:15 AM – 12:30 PM

Approved for 4 TCHs • Code 242M-2026

Smart Investments that support Smart Development

Maine's water systems, miles of buried pipes and related infrastructure, keep our local economies running and our communities healthy. Much of the infrastructure is 50–80 years old, reaching the end of its service life. The ASCE graded the nation's drinking water infrastructure a C– in 2025, and Maine is no exception.

This Forum brings together water utility trustees, managers, and other leaders; state regulators and other government officials; consultants; and other key stakeholders for a critical conversation around replacing aged infrastructure. In particular, buried infrastructure has long been an area of under-investment. Now is the time to consider a sustainable, consistent approach.

CONFIRMED PARTICIPANT PARTNERS

Maine Office of the Public Advocate
Public Advocate, Heather Sanborn

Maine Public Utilities Commission

Maine CDC Drinking Water Program
Amy Lachance &
McKenzie Parker, P.E.

Maine Water Utilities Association
Key Leaders &
Water Utility Managers

Why This Matters

Consistent reinvestment increases water system reliability, protecting both local economies and community health. Continued delays in infrastructure renewal put critical water services (and all of us relying on them) in jeopardy.

Join us to learn more and embark in a constructive collaborative conversation!
